

## **Understanding the Dataset**

Understanding India's crop output is the foundation of this research. Utilize the link below to download the dataset. It comprises 6 features (columns) and 2,46,092 data points (rows) that describe each crop's production related information.

Let's examine the data we're dealing with and provide a quick summary of what each feature means or should mean.

1. State Name - All the names of the Indian States
2. District Name : Different District Names in the District.
3. Crop Year : The crop years are contained in step three.
4. Season : Crop production occurs during various seasons.
5. Area : The overall amount of areas covered.
6. Production : Crop production.
