

PROJECT FLOW

- Users produce numerous charts and graphs for analysis.
- The Dashboard is created using the analysed chart.
- Using IBM Cognos Analytics to save and display the final dashboard.

We must finish all of the projects and tasks on the following list in order to achieve this.

- Account with IBM Cloud
- Access Cognos Analytics.
- Utilizing the Dataset
- Recognize the dataset
- Dataset loading • Charts for data visualisation
- Production-average seasons
- Years of Area and Production Use
- The ten largest states by area
- A state that produces crops
- States with seasons and crop production (Text Table)
- Designing a dashboard
- Download the Analytics
